Programming Flowchart

CUI – Compact User Interface

Legend
1C – 1 Click
2C = 2 Clicks, etc…
PH = Push & Hold

How to use this Flowchart
1. Always start with the light off or at ***Start Here.***.
2. If you are lost in the programming tree, a couple of series of 3 Clicks will exit without saving anything.
3. To Save a setting, Click 3 times and PH.
4. Get familiar with CUI before programming FUI
5. When the light changes modes or remembers a setting it will blink twice.
6. I suggest finding the option you want to set then work backwards until you get back to a root mode.
