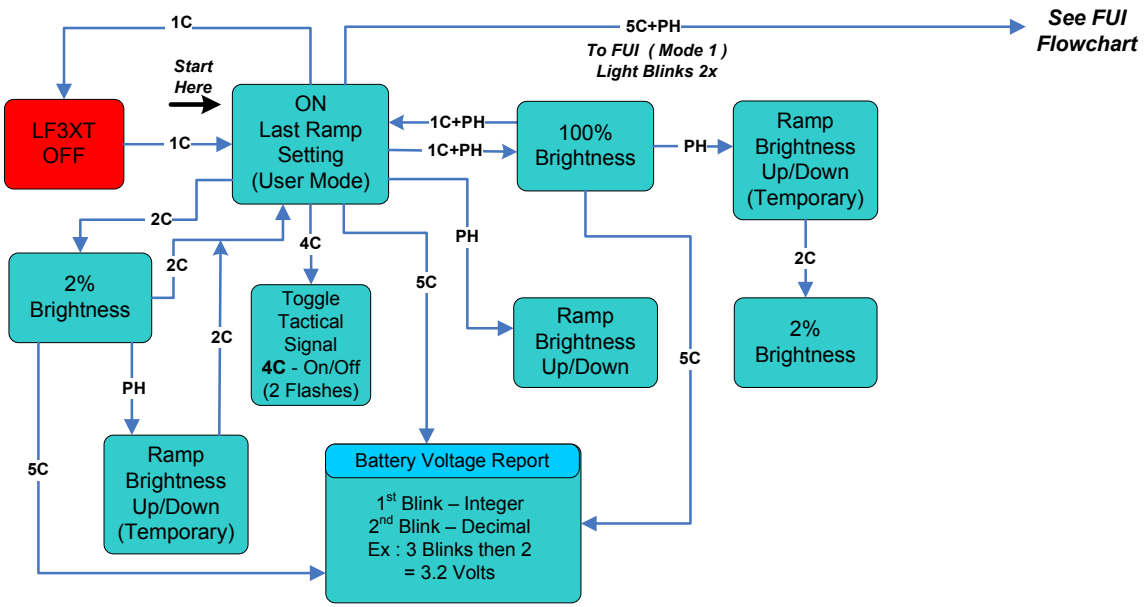
Liteflux LF3XT
CUI Usage Flowchart
CUI – Compact User Interface

Legend
1C – 1 Click
2C = 2 Clicks, etc…
PH = Push & Hold



** CUI is the default mode out of the box.*

How to use this Flowchart
* There are two different flowcharts. One for CUI Mode and one for FUI Mode.
1. Always start with the light off or at ***Start Here.***.
2. If you are lost in the programming tree, a couple of series of 3 Clicks will exit without saving anything.
3. Get familiar with CUI before programming FUI
4. When the light changes modes or remembers a setting it will blink twice.
5. Programming Suggestion - Find the option you want to set then work backwards until you get back to a root mode.
